

AIR VENT VALVES

- Automatic air vent valves
- Manual air vent valves
- Air vent valves for radiator

The air vent allows to remove the air which normally is stored in the heating systems. By removing the air it is allowed a better performance and duration of the system, avoiding corrosion phenomenon due to parts' oxidation, air bubbles in the heating elements which cause reduction in their performance, bad working of the pumps with damages and noise.

Advantages

- System protection
- Increased performances

Y47L

Automatic air vent valve

Max working temperature 95°C

cod.	size	P [bar]	NPS	NPC	€

P83

Manual air vent valve with adjustable drain position - nickel plated

Max working temperature 95°C

cod.	size	P [bar]	NPS	NPC	€
P83 015 N00	G1/2"M	10	-	-	

P60

Manual air vent valve with PTFE seal - nickel plated

Max working temperature 110 °C
Open length 28mm
Close length 25mm

cod.	size	P [bar]	NPS	NPC	€
